LIAPOR HYDROTON - CLAY PEBBLES

Keep your crops hydrated and healthy with **Liapor Hydroton** expanded clay grow medium.

Liapor offers a ceramic, pure mineral substrate made of expanded clay. It is especially suitable for hydroponics and aquaponics and is applied in the interior design, the planting of pots, for drainage layers, but also in the fields of ornamental plant and plant breeding. Due to the production process in a rotary kiln at a temperature of about 1,200 °C, Liapor® is germfree as well as chemically and biologically neutral. Both the matched particle shape and the distribution of the pores have a capillary conductive effect. The substrate drains and supports the gas exchange at the roots. Good for the environment All the Liapor expanded clays are produced environmentally sound and reusable and don't burden the environment when they are cleaned up.

AQUAPONIC GARDENING BOOK

Aquaponics Gardening Book

₱ 1,950.00

Aquaponics Gardening is the definitive do-it-yourself home manual, focused on giving you all the tools you need to create your own aquaponics system and enjoy healthy, safe, fresh, and delicious food all year round. Starting with an overview of the theory, benefits, and potential of aquaponics, the book goes on to explain:

- System location considerations and hardware components
- The living elements—fish, plants, bacteria, and worms
- Putting it all together—starting and maintaining a healthy system
- This accessible book is also infused with humor and warmth; using quotes, stories and images from actual aquaponics gardeners throughout.

Aquaponics systems are completely organic. They are four to six times more productive and use ninety percent less water than conventional gardens. Other advantages include no weeds, fewer pests, and no watering, fertilizing, bending, digging, or heavy lifting—in fact, there really is no downside! Anyone interested in taking the next step towards self-sufficiency will be fascinated by this practical, accessible, and well-illustrated guide.

Aquaponics Go Green Trading & Enterprise

Sylvia Bernstein is the president and founder of the aquaponics Source. An internationally recognized expert on aquaponics gardening, Sylvia speaks, writes, and blogs extensively about this revolutionary technique.

NET POT (TEKU BRAND)

These pots are excellent for Aquaponics and Hydroponics

Excellent quality **net pots** are thicker and more heavy-duty than most on the market. Smaller mesh allows the grower to use virtually all types of grow media.
