

AQUAPONIC GARDENING BOOK

Aquaponics Gardening Book

₱ 1,950.00

Aquaponics Gardening is the definitive do-it-yourself home manual, focused on giving you all the tools you need to create your own aquaponics system and enjoy healthy, safe, fresh, and delicious food all year round. Starting with an overview of the theory, benefits, and potential of aquaponics, the book goes on to explain:

- System location considerations and hardware components
- The living elements—fish, plants, bacteria, and worms
- Putting it all together—starting and maintaining a healthy system
- This accessible book is also infused with humor and warmth; using quotes, stories and images from actual aquaponics gardeners throughout.

Aquaponics systems are completely organic. They are four to six times more productive and use ninety percent less water than conventional gardens. Other advantages include no weeds, fewer pests, and no watering, fertilizing, bending, digging, or heavy lifting—in fact, there really is no downside! Anyone interested in taking the next step towards self-sufficiency will be fascinated by this practical, accessible, and well-illustrated guide.

Sylvia Bernstein is the president and founder of the aquaponics Source. An internationally recognized expert on aquaponics gardening, Sylvia speaks, writes, and blogs extensively about this revolutionary technique.
