BIO BALLS - BLACK (36MM)

Black Bio Ball (36mm-50pcs)

Use as the biological media in the filters, such as aquarium, fish tank and pond filter media. These plastic bio balls have lots of surface area for filtering the water, can promote gas exchange, increases dissolved oxygen level and removes harmful gases.

Price: ₱750.00
Category: Filter Media

FILTER BRUSH (BLACK)

Filter Brush (Black)

- 12 x 70 cm
- Filter brush for Pond and aquaponics.

Filter brushes are made from the very highest quality materials twisted into two stainless steel wires to form a cylindrical brush with a loop at one end for hanging. The other end is capped with a plastic knob for safety. They last indefinitely and are the easiest to use, most efficient and most cost-effective pond filter medium you can buy. Our brushes are used in filtration systems in fish farms, hatcheries, public aquaria, domestic fish ponds and research institutes in this country and abroad. No other filter medium is as widely used or has been as extensively tested and proved.

Price: ₱205.00
Category: Filter Media

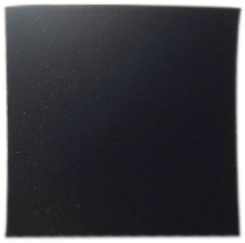

BIO BALLS - BLACK (26MM-100PCS)

Black Bio Ball (26mm-100pcs)

Use as the biological media in the filters, such as aqurium, fish tank and pond filter media. These plastic bio balls have lots of surface area for filtering the water, can promote gas exchange, increases dissolved oxygen level and removes harmful gases.

Price: ₱350.00
Category: Filter Media

BIO-FILTER SPONGE FINE (BLACK - 30 PPI)

Looking for an effective and versatile filter for your aquarium, marine, freshwater, planted, aquaponics, or hydroponics system? Look no further than the BioFilter Sponge (Black). With the ability to cut to size, this sponge can be easily customized to fit your filter and ensure optimal water quality in any system.

Our Fine BioFilter Sponge is made from high-quality materials, designed to provide the best environment for bacteria growth. Through experimentation, we have found that the sponge's molecule hole size and softness are perfectly suited to encourage the development of beneficial bacteria, helping to dissolve waste and improve water quality in all types of aquatic environments. Measuring 60 x 45 x 8mm with a 30PPI, this sponge is ideal for use in systems that require a finer filter material.

By using our BioFilter Sponge, you can enjoy a lower mortality rate for your fish and plants and maintain a healthier, more vibrant aquatic environment. This sponge is the perfect choice for any aquarium, aquaponics, or hydroponics enthusiast.

Invest in the BioFilter Sponge (Black) today and give your fish, plants, and aquatic systems the healthy and happy home they deserve.

BIO-FILTER SPONGE ROUGH (BLACK - 15 PPI)

Looking for a durable and effective filter material for your aquarium, marine, freshwater, planted, aquaponics, or hydroponics system? Look no further than the Rough BioFilter Sponge (Black). Measuring 60 x 45 x 8mm with a 15 PPI, this sponge is designed to filter out larger particles and debris, while still promoting the growth of beneficial bacteria.

Our Rough BioFilter Sponge is made from high-quality materials, designed to withstand the rigors of aquarium and aquatic system use. By using our Rough BioFilter Sponge, you can ensure that your system remains free of harmful debris and contaminants, while also promoting the growth of beneficial bacteria that help dissolve waste and improve water quality.

With the ability to cut to size, the Rough BioFilter Sponge can be easily customized to fit your filter, ensuring optimal performance and water quality in any system. Whether you're a seasoned aquarist or a new aquaponics or hydroponics enthusiast, our Rough BioFilter Sponge is the perfect choice for ensuring the health and well-being of your aquatic pets and plants.

Invest in the Rough BioFilter Sponge (Black) today and give your aquatic systems the healthy and happy home they deserve.
