PLASTIC AIR VALVE 2 WAY AIR PUMP CONTROL VALVES FOR AQUARIUM | FISH TANK (YELLOW)

Features:

1. Simple design for easy use.Easy installation, just insert the connector directly into the air pipe.
2. Made of high quality plastic, strong and durable, fine workmanship, long service life.
3. High strength, high temperature resistant, corrosion resistant, non-toxic, abrasion resistant.They are suitable for a wide range of applications where liquids and gases are used.
4. A small piece of non-toxic plastic that allow you connect two or more air tubing.
5. The Aquaculture Air Valves can be connected to aquarium tubing.

AQUARIUM AIR STONE | AIR DISK OXYGEN BUBBLES FOR FISH TANK POND PUMP AERATION

OUTPUT : 20L/min
Specification : 130x19x6mm
An airstone, also called an 'aquarium bubbler', is a piece of aquarium furniture.

Traditionally a piece of limewood or porous stone, whose purpose is to gradually diffuse air into the tank, elminating the noise and large bubbles of conventional air filtration systems, and provides other benefits to the health of fish.

Price: ₱185.00
Category: Airpump Accessories

Aquaponics Go Green Trading & Enterprise

AIR STONE 1.5×3 CM (HA003)

An airstone, also called an 'aquarium bubbler', is a piece of aquarium furniture.

Traditionally a piece of limewood or porous stone, whose purpose is to gradually diffuse air into the tank, eliminating the noise and large bubbles of conventional air filtration systems, and provides other benefits to the health of fish.

Size: 15x30mm

Price: ₱10.00
Category: Airpump Accessories

AIR STONE 3X7CM (HB010) - AQUARIUM AIR STONE OXYGEN BUBBLES FOR FISH TANK POND PUMP AERATION

Product Details:

An airstone, also called an '**aquarium bubbler**', is a piece of aquarium furniture.

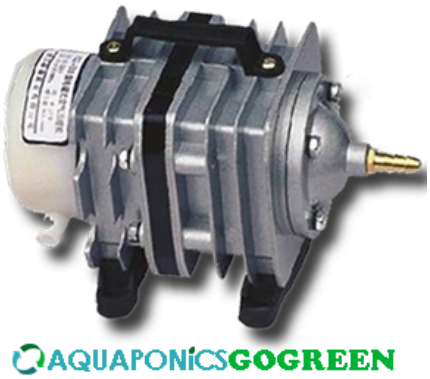

Traditionally a piece of limewood or porous stone, whose purpose is to gradually diffuse air into the tank, elminating the noise and large bubbles of conventional air filtration systems, and provides other benefits to the health of fish.

HG-250 AERATOR (220V)

The SunSun HG-250 aerator is a high-pressure, high-flow rate air blower designed for demanding aeration needs in industrial and aquatic environments such as fish farms and wastewater treatment facilities. It is a durable, oil-free unit known for reliable and continuous operation.

Product Details:

- Voltage: **220V**
- Power(W): **250**
- Pressure: **10.7Kpa**
- Vacuum: **-9 KPa**
- Output: **26.5 m³/h**
- Pressure: **<9KPa**
- Weight (kg): **9**
- Dimensions (L×W×H): **245×238×241mm**

Price: ₱8,500.00
Category: 220V Air Pump

Sunsun 12 Volts HZ-035A Series DC Permanent Magnetic Aerator / Air Pump
This air pump is extensively used in aquaculture, oxygen supply for fresh aquatic products.
Aquariums, live fish market, aquatic products breeding, and fish pond in the park. Especially in transportation and in areas where there is no AC power supply of power failure frequently happens.

SUNSUN HZ-035A 12VOLTS ELECTROMAGNETIC AIR PUMP FOR AQUARIUM | FISH TANK | KOI POND | SALT WATER TANK

FEATURES

• Adopt super-quality DC permanent magnetic motor, which makes the piston move reciprocally in the cylinder and produce air flow that is large in output and high in pressure.
• Non-oil lubricating design to produce purer compressed air.
• Adopt aluminium alloy. The case is small in volume, quick inheat-dissipation and easy to move.
• Phosphorize disposition, regular coloring and adhesive strength.

Product Details:

- Model: **HZ-035A Air Pump**
- Power: **35W**
- Voltage: **DC12V**
- Output: **50L/min.**
- Pressure: **0.55MPa**
- Weight: **2kg**
- Dimensions L×W×H: **200×96×122mm**

Price: ₱2,723.00
Category: 12V Air Pump

LIAPOR HYDROTON - CLAY PEBBLES

Keep your crops hydrated and healthy with **Liapor Hydroton** expanded clay grow medium.

Liapor offers a ceramic, pure mineral substrate made of expanded clay. It is especially suitable for hydroponics and aquaponics and is applied in the interior design, the planting of pots, for drainage layers, but also in the fields of ornamental plant and plant breeding. Due to the production process in a rotary kiln at a temperature of about 1,200 °C, Liapor® is germfree as well as chemically and biologically neutral. Both the matched particle shape and the distribution of the pores have a capillary conductive effect. The substrate drains and supports the gas exchange at the roots. Good for the environment All the Liapor expanded clays are produced environmentally sound and reusable and don't burden the environment when they are cleaned up.

AQUAPONIC GARDENING BOOK

Aquaponics Gardening Book

₱ 1,950.00

Aquaponics Gardening is the definitive do-it-yourself home manual, focused on giving you all the tools you need to create your own aquaponics system and enjoy healthy, safe, fresh, and delicious food all year round. Starting with an overview of the theory, benefits, and potential of aquaponics, the book goes on to explain:

- System location considerations and hardware components
- The living elements—fish, plants, bacteria, and worms
- Putting it all together—starting and maintaining a healthy system
- This accessible book is also infused with humor and warmth; using quotes, stories and images from actual aquaponics gardeners throughout.

Aquaponics systems are completely organic. They are four to six times more productive and use ninety percent less water than conventional gardens. Other advantages include no weeds, fewer pests, and no watering, fertilizing, bending, digging, or heavy lifting—in fact, there really is no downside! Anyone interested in taking the next step towards self-sufficiency will be fascinated by this practical, accessible, and well-illustrated guide.

Sylvia Bernstein is the president and founder of the aquaponics Source. An internationally recognized expert on aquaponics gardening, Sylvia speaks, writes, and blogs extensively about this revolutionary technique.

LIAPOR HYDROTON - CLAY PEBBLES

Keep your crops hydrated and healthy with **Liapor Hydroton** expanded clay grow medium.

Liapor offers a ceramic, pure mineral substrate made of expanded clay. It is especially suitable for hydroponics and aquaponics and is applied in the interior design, the planting of pots, for drainage layers, but also in the fields of ornamental plant and plant breeding. Due to the production process in a rotary kiln at a temperature of about 1,200 °C, Liapor® is germfree as well as chemically and biologically neutral. Both the matched particle shape and the distribution of the pores have a capillary conductive effect. The substrate drains and supports the gas exchange at the roots. Good for the environment All the Liapor expanded clays are produced environmentally sound and reusable and don't burden the environment when they are cleaned up.

CUV-118 UV LIGHT STERILIZER POND WATER CLARIFIER

Product Description:

The most effective way of preventing green water and maintaining optimal conditions in a pond is by incorporating UV sterilization as a part of your pond filtration. The addition of a UV sterilizer/clarifier not only helps control green water, and the suspended algae in your pond, but is an efficient way to control algae while ensuring optimal pond conditions for fish and plants.

Product Details:

- Model: **CUV-118**
- Power: **22W**
- UV-Clamp: **18W**
- Capacity: **20000L**
- Max-pressure: **0.3 bar**
- Flow: **2500L/h**
- Inlet/Outlet Adaptor: **¾”-1 ½”**

Product Details:

- Model: **CPF-180**
- Dimension: **(L*W*H): 410*380*405**
- Inlet and Outlets : **3/4 to 1 ¹/²**
- Filter Capacity in Liters: **8L**
- Crystalline filter area in m² : **70/50 mm**
- Power of UV Lamp: **11W**
- Voltage: 220-240/50Hz
- Max Flow-Through: **12000L/h**
- Cable Length : **5m**
- Weight: **6kg**

Introducing the new generation Bio pressure pond filter CPF-180, the perfect solution for keeping your pond water crystal clear. Equipped with an indicator for pollution, this easy-to-use and uncomplicated bio-pressure pond filter system ensures optimum development of biological pond filter and guarantees high flow rates.

Our system is specially designed to provide quick and reliable results, thanks to the

Aquaponics Go Green Trading & Enterprise

different filter materials such as special filter foams, which effectively remove germs and bacteria from the water. With an integrated 11 W UVC-Pond Clarifier, this pond filter combines both mechanical and biological cleaning processes.

Microorganisms accumulate on the filter materials, while floating particles and dirt remain in the pond filter by means of mechanical filtering. This prevents them from returning to the pond water, ensuring your pond stays clear and healthy.

Invest in the Bio pressure pond filter CPF-180 today and enjoy the benefits of a clean and healthy pond.

CPF-5000 POND BIO PRESS FILTER

The SUNSUN CPF-5000 is a pressurized pond filter that integrates mechanical, biological, and UV-C filtration to purify pond water and enhance its quality. It features an 11W UV sterilizer to reduce algae and eliminate harmful bacteria, along with a built-in cleaning system and indicator for easy maintenance. Suitable for ponds up to approximately 8,000 liters without fish or 1,500–2,500 liters with fish, depending on the model and pump setup.

Product Details:

- Model: **CPF-5000**
- Dimension: **(L*W*H): 380 x 380 x 410 mm**
- Power Consumption: **15w**
- Max Flow-Through: **8000L/h**
- Inlet Hose Adapter: **3/4"- 1-1/2**
- Cable Length: **5m**
- Voltage: **220V**
- Suitable for Ponds up to 8,000 liters

SUNSUN GRECH 3-IN-1 AQUARIUM SUBMERSIBLE FILTER PUMP WITH AIR DEFUSER

PRODUCT SPECIFICATIONS:

CHJ-902

- Multi-Functional Filter Pump
- Freshwater & Seawater
- Voltage:**220V/50Hz**
- Power: **20w**
- Flow: **900L/h**
- Max lift: **1.5m**
- Built-in Filter cotton: **2**
- Power cord: **1.4m**
- Dimensions: **L=73mm x W=50mm x H=287mm**

Features

- The outlet realize multistage over, suitable for a variety of pipe diameter connection
- Adjustable water flow
- With flexible adjuster, easier for you to adjust the height
- Various fountain heads to meet your different requirements
- Best for Aquarium.
- Suitable for fresh water or sea water use, it is safe and durable, ultra-quiet, energy-saving and efficient, easy to maintain and many other advantages.

BIO-FILTER SPONGE FINE (BLACK - 30 PPI)

Looking for an effective and versatile filter for your aquarium, marine, freshwater, planted, aquaponics, or hydroponics system? Look no further than the BioFilter Sponge (Black). With the ability to cut to size, this sponge can be easily customized to fit your filter and ensure optimal water quality in any system.

Our Fine BioFilter Sponge is made from high-quality materials, designed to provide the best environment for bacteria growth. Through experimentation, we have found that the sponge's molecule hole size and softness are perfectly suited to encourage the development of beneficial bacteria, helping to dissolve waste and improve water quality in all types of aquatic environments. Measuring 60 x 45 x 8mm with a 30PPI, this sponge is ideal for use in systems that require a finer filter material.

By using our BioFilter Sponge, you can enjoy a lower mortality rate for your fish and plants and maintain a healthier, more vibrant aquatic environment. This sponge is the perfect choice for any aquarium, aquaponics, or hydroponics enthusiast.

Invest in the BioFilter Sponge (Black) today and give your fish, plants, and aquatic systems the healthy and happy home they deserve.

BIO-FILTER SPONGE ROUGH (BLACK - 15 PPI)

Looking for a durable and effective filter material for your aquarium, marine, freshwater, planted, aquaponics, or hydroponics system? Look no further than the Rough BioFilter Sponge (Black). Measuring 60 x 45 x 8mm with a 15 PPI, this sponge is designed to filter out larger particles and debris, while still promoting the growth of beneficial bacteria.

Our Rough BioFilter Sponge is made from high-quality materials, designed to withstand the rigors of aquarium and aquatic system use. By using our Rough BioFilter Sponge, you can ensure that your system remains free of harmful debris and contaminants, while also promoting the growth of beneficial bacteria that help dissolve waste and improve water quality.

With the ability to cut to size, the Rough BioFilter Sponge can be easily customized to fit your filter, ensuring optimal performance and water quality in any system. Whether you're a seasoned aquarist or a new aquaponics or hydroponics enthusiast, our Rough BioFilter Sponge is the perfect choice for ensuring the health and well-being of your aquatic pets and plants.

Invest in the Rough BioFilter Sponge (Black) today and give your aquatic systems the healthy and happy home they deserve.

CERAMIC RING #10

Ceramic Ring #10

Removes ammonia and nitrites for aquarium, aquaponics, aquaculture and pond.

Product details of White Ceramic Rings Biological Filter Media For Fish Pond, Aquariums and Fish Tanks

- Extremely porous ceramic media for efficient biological filtration.
- Surface area and pores are sized to accommodate bacteria necessary for biological balance and to remove toxic ammonia and nitrite.
- Hollow design effectively distributes water flow and allows massive colonies of beneficial bacteria to grow on and inside each ring, creating an ideal “bio chemical filter”.
- They will not break down in the filter or alter pH or water hardness.
- Great for both fresh and saltwater aquariums
- In the event of excessive buildup, you may gently rinse with water from an established aquarium, if desired

AQUASTAB 50G

- Quickly stabilises and ensures optimal water values (pH, KH, GH)
- Detoxifies in cases of acute nitrite and ammonia poisoning
- Hardener for soft water

Price: ₱1,355.00
Category: Water Treatment

AQUASTAB 100G

- **AquaStab** stabilises the aquarium water on a long term basis within 10 minutes so that the pH and carbonate hardness are stabilised and carbon dioxide absorption capacity is increased.
- **AquaStab** detoxifies your fish in cases of acute nitrite and ammonia poisoning.
- The requirements of viviparous Killifish, East African Cichlids and all fish that prefer medium-hard water are taken into account. With **AquaStab** you can adjust the water values to meet the recommendations of the German Aquarium Society (VDA).
- **AquaStab** detoxifies your fish in cases of acute nitrite and ammonia poisoning.

Application and Dosage Recommendation

Apply every 14 days directly to the Aquarium.

5 g **AquaStab** of 100 Litres for Aquarium water.

CPF-180 POND BIO FILTER

Product Details:

- Model: **CPF-180**
- Dimension: **(L*W*H): 410*380*405**
- Inlet and Outlets : **3/4 to 1 ¹/²**
- Filter Capacity in Liters: **8L**
- Crystalline filter area in m² : **70/50 mm**
- Power of UV Lamp: **11W**
- Voltage: 220-240/50Hz
- Max Flow-Through: **12000L/h**
- Cable Length : **5m**
- Weight: **6kg**

Introducing the new generation Bio pressure pond filter CPF-180, the perfect solution for keeping your pond water crystal clear. Equipped with an indicator for pollution, this easy-to-use and uncomplicated bio-pressure pond filter system ensures optimum development of biological pond filter and guarantees high flow rates.

Our system is specially designed to provide quick and reliable results, thanks to the different filter materials such as special filter foams, which effectively remove germs and bacteria from the water. With an integrated 11 W UVC-Pond Clarifier, this pond filter combines both mechanical and biological cleaning processes.

Microorganisms accumulate on the filter materials, while floating particles and dirt remain in the pond filter by means of mechanical filtering. This prevents them from returning to the pond water, ensuring your pond stays clear and healthy.

Invest in the Bio pressure pond filter CPF-180 today and enjoy the benefits of a clean and healthy pond.

BIO-FILTER SPONGE FINE (BLACK - 30 PPI)

Looking for an effective and versatile filter for your aquarium, marine, freshwater, planted, aquaponics, or hydroponics system? Look no further than the BioFilter Sponge (Black). With the ability to cut to size, this sponge can be easily customized to fit your filter and ensure optimal water quality in any system.

Our Fine BioFilter Sponge is made from high-quality materials, designed to provide the best environment for bacteria growth. Through experimentation, we have found that the sponge's molecule hole size and softness are perfectly suited to encourage the development of beneficial bacteria, helping to dissolve waste and improve water quality in all types of aquatic environments. Measuring 60 x 45 x 8mm with a 30PPI, this sponge is ideal for use in systems that require a finer filter material.

By using our BioFilter Sponge, you can enjoy a lower mortality rate for your fish and plants and maintain a healthier, more vibrant aquatic environment. This sponge is the perfect choice for any aquarium, aquaponics, or hydroponics enthusiast.

Invest in the BioFilter Sponge (Black) today and give your fish, plants, and aquatic systems the healthy and happy home they deserve.

BIO-FILTER SPONGE ROUGH (BLACK - 15 PPI)

Looking for a durable and effective filter material for your aquarium, marine, freshwater, planted, aquaponics, or hydroponics system? Look no further than the Rough BioFilter Sponge (Black). Measuring 60 x 45 x 8mm with a 15 PPI, this sponge is designed to filter out larger particles and debris, while still promoting the growth of beneficial bacteria.

Our Rough BioFilter Sponge is made from high-quality materials, designed to withstand the rigors of aquarium and aquatic system use. By using our Rough BioFilter Sponge, you can ensure that your system remains free of harmful debris and contaminants, while also promoting the growth of beneficial bacteria that help dissolve waste and improve water quality.

With the ability to cut to size, the Rough BioFilter Sponge can be easily customized to fit your filter, ensuring optimal performance and water quality in any system. Whether you're a seasoned aquarist or a new aquaponics or hydroponics enthusiast, our Rough BioFilter Sponge is the perfect choice for ensuring the health and well-being of your aquatic pets and plants.

Invest in the Rough BioFilter Sponge (Black) today and give your aquatic systems the healthy and happy home they deserve.

AQUASTAB 50G

- Quickly stabilises and ensures optimal water values (pH, KH, GH)
- Detoxifies in cases of acute nitrite and ammonia poisoning
- Hardener for soft water

Price: ₱1,355.00
Category: Water Treatment

AQUASTAB 100G

- **AquaStab** stabilises the aquarium water on a long term basis within 10 minutes so that the pH and carbonate hardness are stabilised and carbon dioxide absorption capacity is increased.
- **AquaStab** detoxifies your fish in cases of acute nitrite and ammonia poisoning.
- The requirements of viviparous Killifish, East African Cichlids and all fish that prefer medium-hard water are taken into account. With **AquaStab** you can adjust the water values to meet the recommendations of the German Aquarium Society (VDA).
- **AquaStab** detoxifies your fish in cases of acute nitrite and ammonia poisoning.

Application and Dosage Recommendation

Apply every 14 days directly to the Aquarium.

5 g **AquaStab** of 100 Litres for Aquarium water.

FILTERSTARTERBACTERIA 100G

- **FilterstarterBacteria** contains specially cultured, highly pure micro-organisms. They immediately activate the natural biological cleaning powers in the filter and help to ensure that harmful substances are broken down quickly. This eliminates stress factors for pond fish, making them more resistant and vigorous.
  FilterstarterBacteria help to break down plant residues in the pond and significantly increase filter life.
  For use when filter systems are set up and used for the first time, after cleaning filter systems and treating fish with medicines.

UNISEAL RUBBER FITTING • 1”

Uniseal • 1” holesaw 44.4mm

Price: ₱ 320.00

Installation Instructions:

1. Cut hole to the Holesaw size indicated for the UNI SEAL you are using 1” UNI SEAL or 44.4mm Hole (Holesaw).
2. Ensure that the hole is clean cut with sharp edges. Irregularities could cause poor seating and ultimate leakage.
3. Insert the UNI SEAL into the hole with the wide side facing the pipe to be inserted.
4. Make certain that the pipe end to be inserted is clean cut. File the edges so that there are no sharp points to cut UNI SEAL.
5. Using Detergent, lubricate the outside of the pipe end to be inserted, and then push the pipe through the UNI SEAL from the large flange side. The detergent will be squeezed off as the pipe passes through the UNI SEAL. The co-efficient of friction of the rubber holds the pipe tightly in place

Price: ₱320.00

FOLDABLE FISH TANK (R680L) 180 US GAL.

Model: **R680L**

Fish Tank

- Formed of synthetic rubber
- PVC pipe accord with national standard used for fish farm, aquaculture, and koi show.
- Easy to assemble
- Movable and transferable to anywhere you want!
- No more breaking your back moving bulky and heavy through tanks!
- Nontoxic, food grade, UV resistant, ant oxidative, thermostable, cold resistant.
- Stretch-Proof, resistant to stripping, antibacterial, acid & alkali resistant.
- Durable and Non-Distortable
- 3-ply nontoxic rubber synthetic fibre PVC with screen mesh for added protection.
- In case of accidental, ex. knife puncture etc. repair kit is available
  It can house various fishes like barramundi / silver perch /mulloway/ koi / snapper / eel / golden perch/sleepy cod /catfish.

R400L ROUND FISH TANK

Introducing the R400L Round Tank – the perfect choice for aquaponics, hydroponics, and other aquatic needs. With its unique round shape, this tank offers optimal water circulation, creating an ideal environment for your aquatic projects. Experience the simplicity and effectiveness of the R400L Round Tank and watch your aquatic ecosystem thrive like never before.

Model: **R400L**

Classification: **Round Tank**

Diameter (mm): **1,020 mm**

Height (mm): **700 mm**

Aquaponics Go Green Trading & Enterprise

Volume (in Liter): **400L**

Designed for versatility, the R400L Round Tank ensures optimal water circulation, supporting the growth of aquatic plants and organisms in aquaponics and hydroponics systems. With its sleek design and sturdy construction, this tank seamlessly blends into any setting, be it your home, office, or greenhouse. Measuring 1,020 mm in diameter and 700 mm in height, the R400L Round Tank provides ample space for flourishing plants and thriving fish.

With a generous volume of 400 liters, you can create a thriving aquatic ecosystem that promotes mutual growth and sustainability. Crafted with quality materials, the R400L Round Tank is built to withstand the demands of aquaponics and hydroponics applications.

Price: ₱4,950.00
Category: Fish Tanks

R12500L (ROUND FOLDABLE FISHTANK)

Introducing the R12500L Round Tank – the perfect solution for large-scale aquaponics, hydroponics, and other aquatic applications. With its robust construction and impressive specifications, this tank provides an expansive aquatic environment, fostering optimal conditions for the growth of plants and organisms.

- Model: **R12500L**
- Classification: **Round Tank**
- Diameter (mm): **4000 mm**
- Height (mm): **1000 mm**
- Volume (in Liter): **12,500 Liters**
- Outlet : **2" Drain valve**

Designed for versatility, the R12500L Round Tank boasts a substantial diameter of 4000 mm and a height of 1000 mm, offering a vast space for cultivating flourishing plants and thriving aquatic life. The large volume of 12,500 liters ensures that you can create a sustainable and expansive aquatic ecosystem to meet the demands of your aquaponics or hydroponics projects.

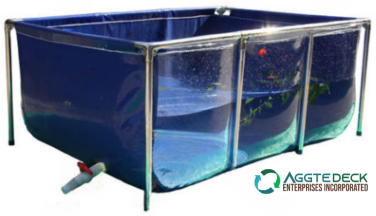

Crafted with durability in mind, this round tank is built to withstand the challenges of large-scale applications. The tank's construction materials ensure longevity, providing a reliable and resilient foundation for your aquaponics or hydroponics system.

With its round shape, the R12500L Round Tank promotes optimal water circulation, enhancing the overall health of your aquatic environment. Whether utilized in commercial settings, research facilities, or educational institutions, this tank is designed to meet the diverse needs of those engaged in advanced aquaponics and hydroponics practices.

Experience the simplicity and efficiency of the R12500L Round Tank, and elevate your aquatic projects to new heights. Create a thriving and sustainable ecosystem that supports the simultaneous growth of plants and aquatic organisms, making it the ideal choice for large-scale aquaponics and hydroponics endeavors.

RC140L (STAINLESS STEEL RECTANGULAR PVC FISH TANK)

Introducing the RC140L Rectangular Tank – a sleek and efficient solution for your aquatic projects. Crafted with a combination of stainless steel and PVC, this tank provides a durable and modern design suitable for a variety of applications. With a volume of 140 liters and a convenient 1" drain valve outlet, the RC140L is a versatile choice for aquaculture, fish farming, and other aquatic endeavors.

- Model: **RC140L**
- Dimension: **80 x 50 x 35 cm**
- Classification: **Rectangular Tank (Stainless Steel Rectangular PVC Fish Tank)**
- Volume: **140 Liters**
- Outlet: **1" Drain Valve**

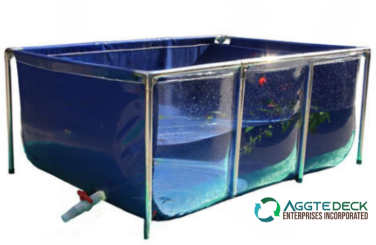

The RC140L Rectangular Tank is designed with practicality in mind. Its stainless steel and PVC construction not only ensures durability but also adds a modern aesthetic to your aquatic setup. The tank's rectangular shape, measuring 80 x 50 x 35 cm, allows for easy integration into various spaces, making it suitable for home aquariums, aquaculture facilities, or research environments.

With a generous volume of 140 liters, this tank provides ample space for aquatic life to thrive. The 1" drain valve outlet enhances convenience in water management, allowing for easy drainage or water changes. This feature is particularly beneficial for maintaining a clean and healthy environment in both freshwater and saltwater setups.

The RC140L Rectangular Tank is a versatile and reliable choice for aquarists and professionals alike. Whether you are cultivating fish, aquatic plants, or conducting research, this tank offers a practical and efficient solution. Elevate your aquatic projects with the RC140L Rectangular Tank and experience the ease of maintaining a thriving aquatic environment.

RC1200L (STAINLESS STEEL RECTANGULAR PVC FISH TANK)

Introducing the RC1200L Rectangular Tank – an exceptional choice for aquatic enthusiasts and professionals seeking a robust and spacious solution for their projects. With its stainless steel and PVC construction, this tank is designed for durability and versatility, making it ideal for various applications, including aquaponics systems. The RC1200L offers a substantial volume of 1,200 liters, a convenient 1" drain valve outlet, and generous dimensions of 200 x 100 x 61 cm.

- Model: **RC1200L**
- Dimension: **200 x 100 x 61 cm**
- Classification: **Stainless Steel Rectangular PVC Fish Tank**
- Volume: **1,200 Liters**
- Outlet: **1" Drain Valve**

The RC1200L Rectangular Tank is crafted with a combination of stainless steel and PVC, ensuring durability and a sleek appearance. Its rectangular shape and dimensions of 200 x 100 x 61 cm provide ample space for aquatic life, making it an excellent choice for both hobbyists and professionals.

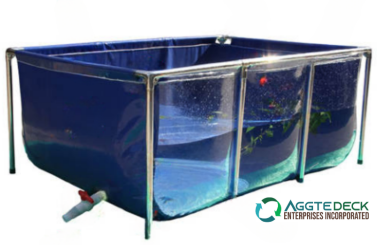

This tank's significant volume of 1,200 liters accommodates the needs of various aquatic projects, from large-scale fish farming to intricate aquaponics systems. The 1" drain valve outlet enhances convenience in water management, facilitating easy drainage and water changes.

Application for Aquaponics System:
The RC1200L Rectangular Tank is specifically designed to meet the demands of aquaponics systems. Its generous volume allows for the cultivation of a diverse range of plants and fish in a symbiotic environment. In an aquaponics setup, the nutrient-rich water from the fish tank circulates through the planting beds, providing essential nutrients for plant growth. The plants, in turn, help filter and purify the water, creating a balanced ecosystem.

Whether you are a seasoned aquaponics enthusiast or a beginner looking to explore sustainable and integrated farming practices, the RC1200L Rectangular Tank provides the perfect foundation for a thriving aquaponics system. Elevate your aquaponics experience with the reliability and versatility of the RC1200L Rectangular Tank.

RC3190L (STAINLESS STEEL RECTANGULAR PVC FISH TANK)

Presenting the RC3190L Rectangular Tank – a versatile and capacious solution for aquatic enthusiasts and professionals alike. With its durable stainless steel and PVC construction, this tank stands as an exceptional choice for various applications, including aquaponics systems. Boasting a generous volume of 3,190 liters, a convenient 2" drain valve outlet, and dimensions measuring 300 x 150 x 71 cm, the RC3190L is designed to meet the diverse needs of aquaculture and sustainable farming practices.

- Model: **RC3190L**
- Dimension: **300 x 150 x 71 cm**
- Classification: **Stainless Steel Rectangular PVC Fish Tank**
- Volume: **3,190 Liters**
- Outlet: **2" Drain Valve**

Application for Aquaponics System:

The RC3190L Rectangular Tank serves as an excellent foundation for aquaponics systems, offering a spacious environment for cultivating both aquatic plants and fish. With its substantial volume, this tank allows for the creation of a thriving ecosystem where fish waste provides essential nutrients for plant growth, and the plants, in turn, help filter and purify the water, creating a sustainable and balanced aquaponics setup.

The 2" drain valve outlet enhances the efficiency of water management, facilitating easy drainage and water changes in the aquaponics system. Whether you're a seasoned aquaponics enthusiast or a farmer looking to embrace sustainable agriculture, the RC3190L Rectangular Tank provides the durability and versatility needed to support a flourishing aquaponics environment.

Elevate your aquaponics endeavors with the RC3190L Rectangular Tank – a reliable and spacious solution designed to meet the demands of integrated and sustainable farming practices.

R33900L | ROUND FOLDABLE FISHTANK

Introducing the R33900L Round Tank – your ultimate solution for expansive aquaponics, hydroponics, and large-scale water storage needs. Designed with exceptional durability and impressive capacity, this tank is perfect for creating a thriving aquatic environment and sustainable gardening system.

- Model: **R33900L**
- Classification: **Round Tank**
- Diameter (mm): **6000 mm**
- Height (mm): **1000 mm**
- Volume (in Liter): **33,900 Liters**
- Outlet : **2" Drain valve**
- Price: **₱103,500**

With a substantial diameter of 6000 mm and a height of 1000 mm, the R33900L Round Tank offers a vast 33,900-liter volume, providing ample space for optimal

Aquaponics Go Green Trading and Enterprise

water circulation and growth of plants and aquatic life. Its robust construction ensures long-lasting performance, making it a reliable choice for large-scale projects and intensive applications.

Engineered to enhance water management and sustainability, the round shape of the R33900L promotes efficient circulation and balance within the tank, supporting both commercial and research-based aquaponics or hydroponics systems. Whether you're looking to advance your agricultural practices or set up a comprehensive aquatic ecosystem, this tank meets the highest standards of quality and functionality.

Elevate your projects with the R33900L Round Tank and enjoy the benefits of a spacious, durable, and versatile solution for all your aquatic and gardening needs. Make the R33900L your choice for creating a flourishing and efficient environment today.

R8500L | ROUND FOLDABLE FISHTANK

Introducing the R8500L Round Tank – an ideal solution for efficient water storage and versatile aquaponics or hydroponics applications. With a robust design and ample capacity, this tank is perfect for both small to medium-scale projects and sustainable gardening.

- Model: **R8500L**
- Classification: **Round Tank**
- Diameter (mm): **4000 mm**
- Height (mm): **1000 mm**
- Volume (in Liter): **8,900 Liters**
- Outlet : **2" Drain valve**
- Price: **₱36,500**

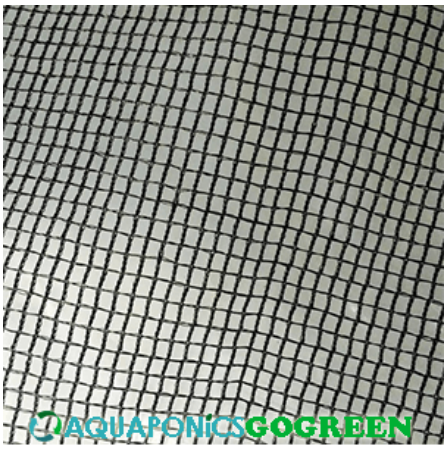

The R8500L Round Tank features a 4000 mm diameter and a height of 1000 mm, offering a spacious 8,900-liter capacity. Its well-crafted construction ensures durability and reliability, making it a practical choice for various applications, from residential gardens to commercial systems.

Designed to enhance water circulation and support the health of your aquatic environment, this round tank is versatile and built to last. The 2" drain valve allows for easy maintenance and efficient water management.

Perfect for both new and experienced gardeners, the R8500L Round Tank provides a dependable foundation for creating thriving aquaponics and hydroponics systems. Invest in quality and efficiency with the R8500L and take your projects to the next level today.

UV POLYPROPYLENE WOVEN SHADE NET - 20% BLACK (2.4-METERS WIDTH)

Use shade nets to protect your plants from the heat of the sun, 20% shade net costs ₱120.00 per meter. (2.4 m width)

Price: ₱120.00
Category: Green House Materials

UV POLYPROPYLENE WOVEN SHADE NET - 50% BLACK (2.5-METERS WIDTH)

UV Polypropylene Woven Shade Net - 50% Black

- Use shade nets to protect your plants from the heat of the sun, 50% shade net
- (2.5 meters width)

Features:

- Custom cut shade fabric
- Black
- UV resistant polypropylene monofilament strands
- Blocks out 50% of sunlight
- Long lifespan when properly stored
- Keeps the soil cool and reduces moisture loss through evaporation

PP woven shade net protects your sensitive plants from the sun. Popular for use as a covering for greenhouses and row tunnels, it provides protection from heat and UV rays even under intense conditions.

This woven shade cloth provides crop protection, but also can be used as a privacy screen or windbreak, as well as shade for sporting events, patios, livestock, and pet kennels.

UV POLYETHYLENE KNITTED SHADE NET (2.5-METERS 55% BLACK)

UV Polyethylene Knitted Shade Net (2.6-meters 55% Black)

- Use shade nets to protect your plants from the heat of the sun, 55% shade net
- Sold per meter (1 x 2.6 m width)

Features:

- UV resistant
- Made from high-density polyethylene strands
- Stronger, and lighter than woven shade cloth
- Naturally rot and mildew proof
- Lock stitch designs reduces heat build and reduces wind speed
- Resistant to a range of agricultural chemicals, sprays and detergents

Perfect for greenhouse covering and many other applications including crop protection, livestock shading, bird netting, windbreak and privacy screen and much more. This fabric is very popular when used as a greenhouse covering as it not only offers heat and UV protection but can also reduce damage from the elements and extend the life of your plastic. Keeps soil underneath cool and reduces moisture loss through evaporation in excessive heat.

Use this cloth as a wind break, as a privacy screen on patios, and decks or for temporary fencing. Other applications sport arena shading, ball diamonds, swimming pool covers and tennis court walls, Kennel shading, row tunnels and other shade structures.

Build your System: Grow Bed System Materials What do you need in order to setup and build your own Grow Bed System? Check out the following items and start building your own System!

LIAPOR HYDROTON - CLAY PEBBLES

Keep your crops hydrated and healthy with **Liapor Hydroton** expanded clay grow medium.

Liapor offers a ceramic, pure mineral substrate made of expanded clay. It is especially suitable for hydroponics and aquaponics and is applied in the interior design, the planting of pots, for drainage layers, but also in the fields of ornamental plant and plant breeding. Due to the production process in a rotary kiln at a temperature of about 1,200 °C, Liapor® is germfree as well as chemically and biologically neutral. Both the matched particle shape and the distribution of the pores have a capillary conductive effect. The substrate drains and supports the gas exchange at the roots. Good for the environment All the Liapor expanded clays are produced environmentally sound and reusable and don't burden the environment when they are cleaned up.

AQUAPONICSGOGREEN

ZYM-BAC NATURAL BENEFICIAL LIVE BACTERIA

8oz.

Safe for AQUAPONICS and HYDROPONICS

Starts biological filtration and nitrogen cycle Acts quickly and helps prevent “New Tank Syndrome”.

Description:

- Contains only naturally occurring specially cultured beneficial bacteria
- Rapidly seeds biological filters & corrects ammonia/nitrite imbalances
- Improves aquarium conditions for fishes and invertebrates
- Does not affect water pH
- Contains species of bacteria that are beneficial when starting or accelerating the nitrogen cycle of biological filtration, particularly in those holding tanks, ponds, habitats and aquariums in which the proper bacteria are in short supply or are not naturally present.
- Not a medication and is not intended to be a substitute for any medication.
- Non-toxic to humans, pets and aquatic life.
- For ornamental pond, aquarium and aquaponics/hydroponic system fish use only.

FISH COMING OUT OF WATER TREATED WITH FRESH WATER ZYM-BAC ARE SAFE FOR PROCESSING AND HUMAN CONSUMPTION.

AQUAPONICS ELEMENT (SINGLE TEA BAG)

AQUAPONICSGOGREEN

Aquaponics Elements has been specially designed and blended for media based aquaponics gardens such as gravel and clay pebbles. Unlike other trace mineral amendments designed for soil mediums **Aquaponics Elements** will not harm fish or pump systems when used at the recommended levels.

There are many benefits to adding **Aquaponics Elements** to your garden which include:

- Induces flowering and fruiting
- Fish and environment friendly
- Increases the levels of trace mineral elements
- Water soluble
- Economical and easy to use
- Contains no Silicon crystalline quartz
- Will not harm pump system when use as directed.
- Does not add nitrogen to system. (We already have plenty of that)
- Will not burn your plants
- Leaves minimal residue
- Mined in Europe

11% DTPA CHELATED IRON (500G)

IDEAL FOR AQUAPONICS!

DTPA is the best form of chelated iron because it is 100% effective from a pH of 6.0 – 7.5

Directions: Iron levels in an aquaponics system should be at 2 – 3 ppm. You can measure this using Iron Checker. If you don't have a Checker and are just responding to yellowing leaves then we recommend adding approximately 1 – 2 level teaspoons per 100 gallons of water every week or two.

Storage: Store in plastic or stainless steel container in a cool, well-ventilated, dry place at temperatures above 40°F. Prolonged storage at elevated temperatures should be avoided. Avoid contact with aluminum, copper, copper alloys, nickel, and zinc. Do not store near food or feeds.

Warning: Keep out of reach of children. Avoid contact with eyes, skin, and clothing. Avoid inhalation of spray mists. Wash thoroughly with water after handling.

Price: ₱1,500.00

SILICA POWDER 5OZ

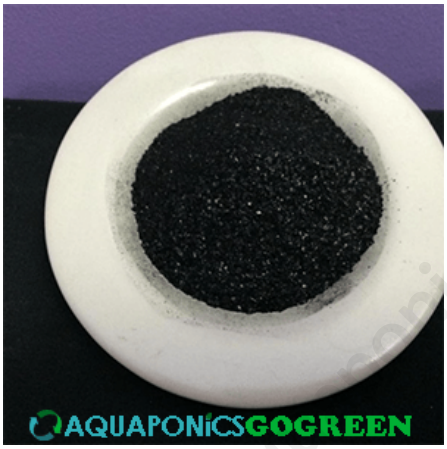

5oz for ₱ 885.00

Stimulates proper cell structure and strengthens plant tissue for healthy, flourishing plants even in adverse environmental conditions such as heat, drought and frost. Substitute with a Natural and Organic Silica Powder to your Nutrient plan. Specifically designed to help your plant respond better to wilt, heat, stress and drought. At the same time Silica is developing your plants cellular walls increasing stem strength and overall health. Our Silica Powder is not a potassium silicate powder product. Derived from Silicone Dioxide, a porous mineral rock which differs greatly from the potassium silicate powder.

Product form:
Dry powder, water soluble

Product designation:
Organic

Price: ₱885.00
Category: Plant Nutrients

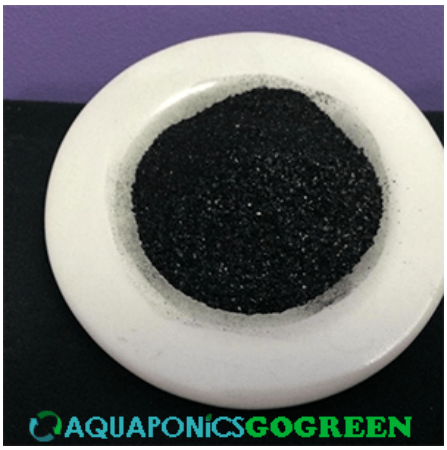

HUMIC BLEND 2.5OZ

2.5oz for ₱ 405.00

Kelp and Humic Acid produce results during every phase of plant growth, whether that be seed germination, vegetative growth, or budding and flowering. The continued use of Kelp Humic Blend ensures vigorous plant growth at every stage serving as a catalyst for all other nutrients to be absorbed.

Price: ₱405.00
Category: Plant Nutrients

Aquaponics Go Green Trading & Enterprise

HUMIC BLEND 5OZ

5oz for ₱ 830.00

Kelp and Humic Acid produce results during every phase of plant growth, whether that be seed germination, vegetative growth, or budding and flowering. The continued use of Kelp Humic Blend ensures vigorous plant growth at every stage serving as a catalyst for all other nutrients to be absorbed.

Price: ₱830.00

AQUAPONICS ELEMENT (SINGLE TEA BAG)

AQUAPONICSGOGREEN

Aquaponics Elements has been specially designed and blended for media based aquaponics gardens such as gravel and clay pebbles. Unlike other trace mineral amendments designed for soil mediums **Aquaponics Elements** will not harm fish or pump systems when used at the recommended levels.

There are many benefits to adding **Aquaponics Elements** to your garden which include:

- Induces flowering and fruiting
- Fish and environment friendly
- Increases the levels of trace mineral elements
- Water soluble
- Economical and easy to use
- Contains no Silicon crystalline quartz
- Will not harm pump system when use as directed.
- Does not add nitrogen to system. (We already have plenty of that)
- Will not burn your plants
- Leaves minimal residue
- Mined in Europe

Price: ₱685.00
Category: Plant Nutrients

Aquaponics Go Green Trading & Enterprise

11% DTPA CHELATED IRON (500G)

IDEAL FOR AQUAPONICS!

DTPA is the best form of chelated iron because it is 100% effective from a pH of 6.0 – 7.5

Directions: Iron levels in an aquaponics system should be at 2 – 3 ppm. You can measure this using Iron Checker. If you don't have a Checker and are just responding to yellowing leaves then we recommend adding approximately 1 – 2 level teaspoons per 100 gallons of water every week or two.

Storage: Store in plastic or stainless steel container in a cool, well-ventilated, dry place at temperatures above 40°F. Prolonged storage at elevated temperatures should be avoided. Avoid contact with aluminum, copper, copper alloys, nickel, and zinc. Do not store near food or feeds.

Warning: Keep out of reach of children. Avoid contact with eyes, skin, and clothing. Avoid inhalation of spray mists. Wash thoroughly with water after handling.

Price: ₱1,500.00

API FRESHWATER MASTER TEST KITS

Measures the most important aquarium levels quickly and accurately

Benefits:

- Tests pH, High Range pH, Ammonia, Nitrite & Nitrate
- Scientifically accurate for professional results

Follow API Easy Care Guide and use the FRESHWATER MASTER TEST KIT:

- During Regular Care
- When addressing Water Problem Solving issues

Taking a few minutes each week to maintain and monitor aquarium conditions is the key to a healthy aquarium. The **FRESHWATER MASTER TEST KIT** tests the parameters that affect the health of freshwater fish: pH, High Range pH, Ammonia, Nitrite and Nitrate. The **FRESHWATER MASTER TEST KIT** is highly accurate and economical, and includes a computer calibrated, laminated colour card, 4 test tubes and holding tray. The **FRESHWATER MASTER TEST KIT** comes with a complete,

Aquaponics Go Green Trading & Enterprise

step-by-step instruction booklet, including information on how to correct unsafe water conditions.

Price: ₱2,500.00
Category: Test Kits

API NITRATE TEST KIT

Highly recommended for all Aquaponics system! Measures nitrate for fresh/salt water and can measure from 0-160 ppm.

Price: ₱893.00
Category: Test Kits

AMMONIA FRESH WATER TEST KIT

Measures ammonia to help prevent fish loss

Benefits:

- Ammonia levels in fresh and saltwater aquariums

Follow API Easy Care Guide and use the AMMONIA TEST KIT:

- During Regular Care
- When addressing Water Problem Solving issues

Taking a few minutes each week to maintain and monitor aquarium conditions is the key to a healthy aquarium. Tropical fish continually release ammonia into the aquarium through their gills, urine and solid waste. Uneaten food and decaying organic matter also add ammonia to the water. Even small amounts of ammonia stress fish; large amounts of ammonia will kill fish. Ammonia is the number one killer of tropical fish. The API® **AMMONIA TEST KIT** is mercury-free, salicylate test for freshwater fish. The **AMMONIA TEST KIT** tests ammonia levels from 0 to 8 ppm.

Price: ₱945.00
Category: Test Kits

Aquaponics Go Green Trading & Enterprise

NITRITE TEST KIT

Nitrite test kit for Fresh and Salt water

Highly recommended for all Aquaponics system

Price: ₱545.00
Category: Test Kits

API PH LOW RANGE TEST KIT

Monitors pH to maintain healthy freshwater conditions

Benefits:

- Fast, easy and accurate
- Reads pH 6.0-7.6

Follow API Easy Care Guide and use the pH TEST KIT:

- During Regular Care
- When addressing Water Problem Solving issues

Taking a few minutes each week to maintain and monitor aquarium conditions is the key to a healthy aquarium. pH control is imperative to prevent the harmful effects of overly alkaline or acidic aquarium water on fish and plant life. Fish require a specific pH level to thrive. However, pH in an aquarium can fluctuate due to fish waste, addition of tap water and the build-up of natural acids. Use this kit to easily and accurately measure the pH level and maintain a healthy freshwater community aquarium.

Why pH in an Aquaponics system is so important?

pH levels (water hardness) are important to successful plant growth as ideal levels help the plant absorb the various important nutrients

You need to find a happy balance for both plants and fish, and that would be between 6.5 and 6.9… but don't worry if it goes as high as 8.

Nature is amazing, and most systems will eventually balance themselves out once the nitrification cycle has taken hold.

Price: ₱210.00
Category: Test Kits

Aquaponics Go Green Trading & Enterprise

PH HIGH RANGE TEST KIT

Fish require specific pH level to thrive. However pH level in an aquarium or pond can fluctuate due to the fish waste. Use this kit to measure pH to maintain a healthy fish and especially in aquaponics system if pH is higher the plants cannot absorb the nutrient. pH kit is also important to test alkaline drinking water.

Read the pH within the high range of 7.4 to 8.8 and can measure 160 tests per kit.

Price: ₱525.00
Category: Test Kits

CUV-218 (UV STERILIZER)

POND AND AQUARIUM UV STERILISER CUV-218

CUV-218 (UV Steriliser)

- Output: **2500 L/h**
- Power: **22 W**
- Capacity: **20000 L**
- Inlet & Outlet Adapter: **20/25/32/38mm**
- Cable Length: **5m**
- Length: **460mm**

Price: ₱4,155.00
Categories: Pond Bio Filter, UV Sterilizers

CUV-211 (UV STERILIZER)

The SUNSUN CUV-211 Steriliser provides an efficient way to keep pond water clean. Using UV radiation, it removes bacteria, germs, and turbidity by neutralizing harmful microorganisms and suspended particles, resulting in a clearer pond. Beneficial surface-bound cleaning bacteria remain unaffected by the radiation.

Product Details:

- Output: **1700 L/h**
- Power: **15w**
- Capacity: **12000**
- Inlet & Outlet Adapter: **20/25/32/38 mm**
- Cable Length: **5m**
- Length: **323mm**

Price: ₱3,250.00

SUNSUN YLB-9500A SUBMERSIBLE WATER PUMP WITH FLOATER SWITCH PROTECTION

Product Description

Model: YLB-9500A

Power: 320W

H-max: 9.5m

Output: 10000L/h

Sunsun Submersible Pump
1. The rotor is made of special material, easily started, and low energy consumption;
2. High-quality ceramic shaft and shaft locator, durable and low noise.
3. Completely sealed and water-proof motor, safe and reliable;
4.High performance standard asynchronous motor with new design, and energy-saving up to 50% than before.
5.Floater switch protection, safer use.
6. Water garden, circulate water in the rockery, supply and discharge water in pond or pool.
