GROWING MEDIA

Leca/ Clay Pebbles – Made in Germany

(8-16mm**- ₱150/kg) & (**16-25mm**- ₱160/kg)**

Per Liter- ₱85 (8-16mm)

Per Liter- ₱100 (16-25mm)

Product information

Liapor offers a ceramic, pure mineral substrate made of expanded clay.
It is especially suitable for hydroponics and aquaponics and is applied in the interior design, the planting of pots, for drainage layers, but also in the fields of ornamental plant and plant breeding.

Due to the production process in a rotary kiln at a temperature of about 1,200 °C, Liapor® is germ-free as well as chemically and biologically neutral. Both the matched particle shape and the distribution of the pores have a capillary conductive effect. The substrate drains and supports the gas exchange at the roots.

Good for the environment

All the Liapor expanded clays are produced environmentally sound and reusable and don't burden the environment when they are cleaned up.

Note: All prices are VAT-exclusive. Applicable VAT will be added to the final quoted price.

ROCKWOOL (3 x 3 x 4 cm)

₱ 195.00/ 50pcs(box)

₱ 11,000.00/ 3,240pcs(box)

Our Rockwool is manufactured from a mixture of natural rocks (basalt and dolomite) Melted at high temperature to form a molten matrix, which is then passed through an air stream that cools the material and forms long fibrous strands.

It has characteristics of excellent stability, non-toxic, and non-pollution. It is an important base material in modern agriculture, is suitable for the industrialized planting of vegetables, fruits, and flowers, etc. Combined with drip irrigation, aquaponics, hydroponics, and other modern technology. The product can enhance the growing speed, improve the efficiency and quantity of the crops and reduce the production cost.

Note: All prices are VAT-exclusive. Applicable VAT will be added to the final quoted price.

Important Notes: K380L Materials- BASIN: fabric reinforced PVC film (BLUE) /Stabilizing Bars: Metal

Please Note: The K380L flexi bowls folding fools are sewn pools. When filling water its can therefore happen those individual drops of water scape from their seams. These seams become denser over time as the fabric soaks up water. We expressly point that this property is not to be classified as a reason for complaint. Ideally, you should set up the pool outdoor or you choose a surface that can catch individual drops pf water that scape at the beginning.

Note: All prices are VAT-exclusive. Applicable VAT will be added to the final quoted price.

R400L ROUND FISH TANK

PRICE:₱ 4,950.00

Model: R400L

Classification: Round Tank

Diameter (mm): 1,020 mm

Height (mm): 700 mm

Volume (in Liter): 400L

Designed for versatility, the R400L Round Tank ensures optimal water circulation, supporting the growth of aquatic plants and organisms in aquaponics and hydroponics systems. With its sleek design and sturdy construction, this tank seamlessly blends into any setting, be it your home, office, or greenhouse. Measuring 1,020 mm in diameter and 700 mm in height, the R400L Round Tank provides ample space for flourishing plants and thriving fish.

With a generous volume of 400 liters, you can create a thriving aquatic ecosystem that promotes mutual growth and sustainability. Crafted with quality materials, the R400L Round Tank is built to withstand the demands of aquaponics and hydroponics applications.

Note: All prices are VAT-exclusive. Applicable VAT will be added to the final quoted price.

BIO FILTER SPONGE

PRICE: ₱ 750.00

60x45x8cm 30 PPI (Fine)

Measuring 60 x 45 x 8cm with a 30 PPI, this sponge is ideal for use in systems that require a finer filter material. By using our Bio Filter Sponge, you can enjoy a lower mortality rate for your fish and plants and maintain a healthier, more vibrant aquatic environment.

BIO FILTER SPONGE

PRICE: ₱ 1,545

60x45x8cm 15 PPI (Rough)

Measuring 60 × 45 × 8 cm, this 15 PPI Bio Filter Sponge features a coarse, open-cell structure ideal for mechanical and biological filtration. It helps trap larger particles while allowing good water flow through the filter media. It also provides a surface for beneficial bacteria to grow, helping maintain better water quality and a healthier aquatic environment for fish and plants.

BIO FILTER SQUARE SPONGE

PRICE: ₱ 335.00

5x45x45cm

Can be used in marine, fresh water, and planted tanks, you can cut to the size that suites your filter According to experiment the molecules hole size and softness is best suitable to develop the best for bacteria Able to dissolve the waste of fishes and help improve water quality that will result lower mortality rate of fish.

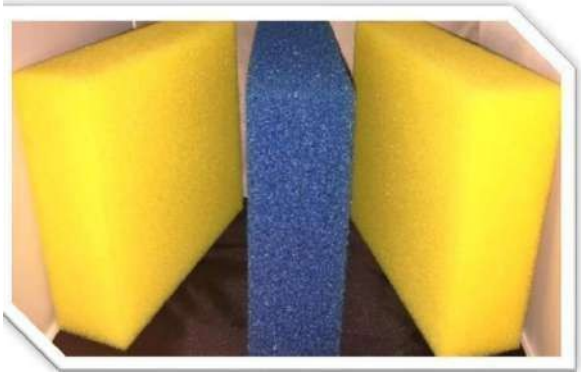

Note: All prices are VAT-exclusive. Applicable VAT will be added to the final quoted price

FILTER SPONGE CBF-350

PRICE ₱ 1,350.00

K1 MEDIA FILTER

₱ 895.00/kg
₱ 195/Liter

Material: High-Density Polyethylene (HDPE)

K1 Media Filter is a lightweight, durable biological filter media designed for aquaculture, aquaponics, koi ponds, aquariums, fish farms, and wastewater treatment systems. Its specially designed structure provides a large surface area for beneficial bacteria to colonize, supporting the biological filtration process.
These beneficial bacteria help break down harmful ammonia and nitrite produced by fish waste and uneaten food, contributing to better water quality and a healthier aquatic environment. The media is suitable for use in moving bed biofilter systems, where continuous water movement helps keep the media in motion and promotes effective filtration.

Key Benefits:
Supports beneficial bacterial growth for biological filtration.
Helps maintain better water quality by supporting ammonia and nitrite breakdown.
Lightweight, durable, and reusable when properly maintained.
Suitable for koi ponds, aquariums, aquaculture, aquaponics, and wastewater treatment.
Ideal for moving bed biofilter systems.

Note: All prices are VAT-exclusive. Applicable VAT will be added to the final quoted price

FILTER BRUSH

PRICE: ₱ 205.00

12 x 70 cm

Filter brush for Pond and aquaponics

Designed for ponds and aquaponics filtration systems, the Filter Brush traps debris and provides surface area for beneficial bacteria to grow, helping improve water quality and support a healthier aquatic environment.

.

Biological Filter Media

PRICE: ₱ 750.00

Black Bio Ball (36mm-50pcs)

When used effectively, bio balls can provide an amazing source of biological filtration. Use as the biological media in the filters, such as an aquarium, fish tank, and pond filter media.

These plastic bio-balls have lots of surface area for filtering the water, can promote gas exchange, increase dissolved oxygen level, and remove harmful gases.

Note: All prices are VAT-exclusive. Applicable VAT will be added to the final quoted price.

API FRESH WATER TEST KIT

PH HIGH RANGE TEST KIT

PRICE: ₱525.00

OUT OF STOCK

Fish require a specific pH level to thrive. However, the pH level in an aquarium or pond can fluctuate due to the fish waste.

Use this kit to measure pH to maintain a healthy fish especially in an aquaponics system if pH is higher the plants cannot absorb the nutrients. pH kit is also important to testalkaline drinking water.

Read the pH within the high range of 7.4 to 8.8 and can measure 160 tests per kit.

PH LOW RANGE TEST KIT

PRICE: ₱210.00

OUT OF STOCK

Benefits:

- Fast, easy and accurate
- Reads pH 6.0-7.6

During Regular Care

When addressing Water Problem Solving issues

Taking a few minutes each week to maintain and monitor aquarium conditions is the key to a healthy aquarium.

PH control is imperative to prevent the harmful effects of overly alkaline or acidic aquarium water on fish and plant life. Fish require a specific pH level to thrive. However, pH in an aquarium can fluctuate due to fish waste, addition of tap water and the build-up of natural acids. Use this kit to easily and accurately measure the pH level and maintain a healthy freshwater community aquarium.

Note: All prices are VAT-exclusive. Applicable VAT will be added to the final quoted price.

Pond Liner Germany

₱ 1,200.00/meter Width: 2m

₱ 2,400.00/meter Width: 4m

Product Description:

Pond Foil PVC 0.5 mm Black

Top Quality – Original Sika PVC Film (polyvinylchloride) is a flexible and soft film. It is the most widespread pond or swimming pond liner. Through its properties, conforms to irregularities such as shallows areas, curves, etc. well can easily be passed. The PVC sheet can be welded with hot air or solvent welding agent. In addition to the general properties mention our PVC films are characterized mainly by the following properties:

- Resistant up to 30 °continuous water temperature
- Free of lead and cadmium
- Weldable
- Optimized tensile strength and elongation at break
- UV stabilized

Note: All prices are VAT-exclusive. Applicable VAT will be added to the final quoted price.

Plastic Welders Hot Air Welding Torch Gun

PRICE: ₱ 22,500.00

Heavy Duty 1600W Hot air heat gun PVC welder Plastic Welding Equipment

Application:

• Plastic fabrication, welding floor, vehicle repair, heat shrinking, car bumper repair, PVC tents, tarpaulins, roof membranes, geotextile films, rigid sheet, plastic sheets, welding tanks, chemical tanks, drying, shrank, wrapping, banner welding, paint stripping

• Welding of thermoplastic materials as well as single-ply flexible plastics and modified bitumen in the form of boards, tubes, profiles, lining membranes, coated materials, films, foams, tiles and sheets.

• Overlap welding, welding with rod, with tape, butt welding and melt welding.

• For foaming, ending and sealing of the thermoplastic semi-finished materials and plastic granules.

• Drying of water-damp surfaces.

• Shrinking of heat-shrink sleeves, films, tapes, solder sleeves, preformed and mold part.

• Soldering of copper pipes, solder joints and metal foils.

• Defrosting of frozen water pipes.

• Activating and dissolving of solvent free adhesive and fusion adhesives

• Igniting of wood shavings, paper, coal or straw in furnaces

Did you know that this is known for its excellent high tensiles trength, resistance to high temperatures, and chemical resistance in corrosive environments?

They are widely used in the industrial sector and in many fields such as Acid and Alkalis equipment, Transport Packaging (RTP), environmental protection equipment, water tank, washing tower, water treatment equipment, chemical containers, machinery, electrical appliances, decoration, etc.

Aside from that, we currently using this material for our Customized Biological Filtration which was installed in our backyard by Mr. Ruhle.

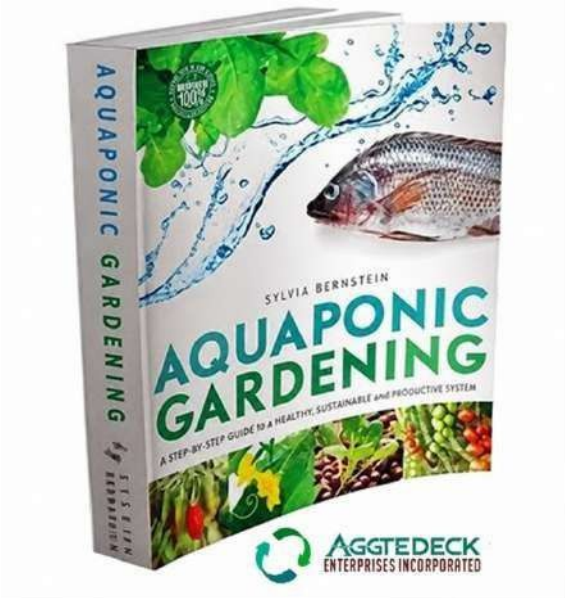

Take note that PP Sheet is easily welded and machined.

Aquaponics Gardening Book

PRICE: ₱ 1,950.00

Product Description:

Aquaponics Gardening is the definitive do-it-yourself home manual, focused on giving you all the tools you need to create your own aquaponics system and enjoy healthy, safe, fresh, and delicious food all year round. Starting with an overview of the theory, benefits, and potential of aquaponics, the book goes on to explain:

System location considerations and hardware components
The living elements—fish, plants, bacteria, and worms
Putting it all together—starting and maintaining a healthy system
This accessible book is also infused with humor and warmth; using quotes, stories and images from actual aquaponics gardeners throughout.

Aquaponics systems are completely organic. They are four to six times more productive and use ninety percent less water than conventional gardens. Other advantages include no weeds, fewer pests, and no watering, fertilizing, bending, digging, or heavy lifting—in fact, there really is no downside! Anyone interested in taking the next step towards self-sufficiency will be fascinated by this practical, accessible, and well-illustrated guide.

Sylvia Bernstein is the president and founder of the aquaponics Source. An internationally recognized expert on aquaponics gardening, Sylvia speaks, writes, and blogs extensively about this revolutionary technique.

Note: All prices are VAT-exclusive. Applicable VAT will be added to the final quoted price.

PLANT NUTRIENTS

Maxicrop Seaweed Extract (Made in USA)

PRICE: ₱ 2,500.00

Maxicrop powder seaweed is a great choice for those who do not want to use synthetic rooting compounds or for those who want to feed their plants more than 70 minerals, vitamins, and enzymes. Maxicrop is extracted from Norwegian seaweed. This all-natural product has a guaranteed analysis of 1-0-4.

Maxicrop is excellent for soaking seeds to improve germination and for feeding plants during system cycling.This is the same as the Australian Seasol product soluble powder form.

Maxicrop Seaweed Extract – 10.7 oz.

When used as a foliar feed, the seaweed is absorbed through the pores in the leaves and travels through the plant. Amounts are adjustable be need.

Chelated Iron – 11% DTPA (5oz)

PRICE: ₱ 790.00

Ideal for Aquaponics!

DTPA is the best form of chelated iron because it is 100% effective from a pH of 6.0 – 7.5

Directions: Iron levels in an aquaponics system should be at 2 – 3 ppm. You can measure this using Iron Checker. If you don't have a Checker and are just responding to yellowing leaves then we recommend adding approximately 1 – 2 level teaspoons per 100 gallons of water every week or two.

Storage: Store in plastic or stainless steel container in a cool, well-ventilated, dry place at temperatures above 40°F. Prolonged storage at elevated temperatures should be avoided. Avoid contact with aluminum, copper, copper alloys, nickel and zinc. Do not store near food or feeds.

Warning: Keep out of reach of children. Avoid contact with eyes, skin and clothing. Avoid inhalation of spray mists. Wash thoroughly with water after handling.

Note: All prices are VAT-exclusive. Applicable VAT will be added to the final quoted price.

Aquaponics Elements -Single Tea Bag (112g)

PRICE: ₱ 685.00

Aquaponic Elements has been specially designed and blended for media based aquaponic gardens such as gravel and clay pebbles. Unlike other trace mineral amendments designed for soil mediums Aquaponic Elements will not harm fish or pump systems when used at the recommended levels.

There are many benefits to adding Aquaponic Elements to your garden which include:

-Induces flowering and fruiting.
-Fish and environmentally friendly.
-Increases the levels of trace mineral elements.
-Water soluble.
-Economical and easy to use.
-Contains no Silicon Crystalline Quartz.
-Will not harm pump systems when used as directed.
-Does not add nitrogen to the system. (we already have plenty of that!)
-Will not 'burn' your plants.
-Leaves minimal residue.
-Mined in Europe

Humic Blend (5oz)

PRICE: ₱ 830.00

Kelp and Humic Acid produce results during every phase of plant growth, whether that be seed germination, vegetative growth, or budding and flowering. The continued use of Kelp Humic Blend ensures vigorous plant growth at every stage serving as a catalyst for all other nutrients to be absorbed.

When and where to use:

All stages of plant development. Use kelp powder to improve specific growth states. For example, to promote buds, apply kelp when plants are beginning to bud. Use to extend shelf life of fruits and vegetables by spraying 10 days before harvest. To lengthen life of cut flowers, spray 1 to 2 days before cutting. For maximum effectiveness, apply every 4 to 7 days.

Why use it?

Kelp and Humic Acid produce results during every phase of plant growth, whether that be seed germination, vegetative growth, or budding and flowering. The continued use of Kelp Humic Blend ensures vigorous plant growth at every stage serving as a catalyst for all other nutrients to be absorbed.

Note: All prices are VAT-exclusive. Applicable VAT will be added to the final quoted price.

Silica Powder (5oz)

PRICE: ₱ 885.00

Stimulates proper cell structure and strengthens plant tissue for healthy, flourishing plants even in adverse environmental conditions such as heat, drought and frost. Substitute with a Natural and Organic Silica Powder to your Nutrient plan. Specifically designed to help your plant respond better to wilt, heat, stress, and drought.

At the same time, silica is developing your plants cellular walls increasing stem strength and overall health. Our Silica Powder is not a potassium silicate powder product. Derived from Silicone Dioxide, a porous mineral rock that differs greatly from the potassium silicate powder.

Product form:

Drypowder, water soluble

Product designation:

Organic

Soluble Gypsum Powder (5oz)

PRICE: ₱ 425.00

Well suited for:

Hydroponics, soil and soil-less.

How to mix:

Mix 2 to 4 oz. with one (1) gallon of water to cover 100 to 500 sq. ft.

For foliar application:

Mix one (1) oz. with one (1) gallon of water

When and where to use:

Start with early season soil preparations and supplement as needed during the grow and bloom cycles.

Note: All prices are VAT-exclusive. Applicable VAT will be added to the final quoted price.

Key to Life- Silica Powder

PRICE: ₱ 950.00

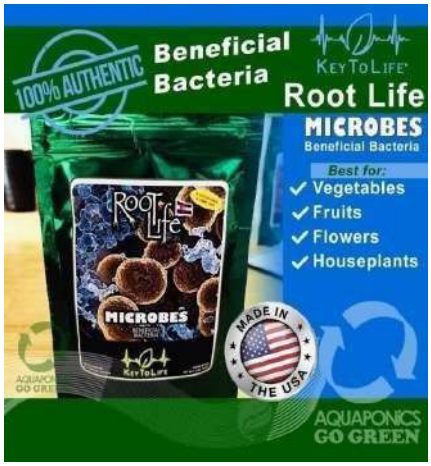

Great source of calcium & iron. It improves plant strength & yield; a real night & day difference in every aspect of plant condition.

Use to fight deficiencies.

TIPS

Use dechlorinated/R.O./high quality H2O (quality may change seasonally). Keep nutrient mix/H2O aerated & below 73 degrees. Maintain proper pH levels, between 5.5-6.8. Monitor PPM & EC with meter. This is a supplement, use in addition to current regimen. Change nutrient mix every week.

Key to Life - Root Life - Microbe

PRICE: ₱ 1,550.00

Bacillus, Mother Nature's most powerful mini army of helpers & a root's best friend. This is an extremely efficient way to inoculate aerobic bacteria directly into the root zone. Use to create a vigorous root system.

BENEFICIAL BACTERIA

When introduced, Bacillus has an impact on plant health through promoting plant health & nutrition as well as boosting plant defenses. When a biological community is composed of specific species that use distinct resources, there is less free room for invading species to establish themselves.
